Spring 2017 Catalogue

Rundle Wood Gardens Ltd.

Achlys triphylla

Flower: CREAM in Early Summer

Light: PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 20 cm

Attractive 3-part fan-shaped leaves have a sweet vanilla scent when dried. Excellent ground cover plant for shady woodland areas. (Family: Berberidaceae; Native to: Western N. America)

Vanilla Leaf

(15cm Pot) \$13.00

Aconitum alboviolaceum

Flower: VIOLET AND WHITE in Late Summer

Light: SUN to PARTIAL SHADE **Soil:** AVERAGE **Height:** 150 cm

A twining Monkshood native to Korea, Russia and China growing in forests and in scrub. Basal rosettes of large, sturdy, lobed foliage out of which grow twining stems cloaked with tall, narrow violet hoods with white lower petals (Limited Availability) (Family: Ranunculaceae; Native to: Russia)

White & Violet Monkshood

(13cm Deep Pot) \$12.00

Aethionema schistosum

Flower: PINK in Early Summer

Light: FULL SUN **Soil:** ROCK GARDEN **Height:** 14 cm

forms a symmetrical mound of blue-green leaves covered with fragrant, pale pink flowers in spring. Drought resistant. (Family: Cruciferae; Native to: Turkey)

Fragrant Stonecress

(9cm Pot)\$8.00

Alchemilla alpina

Flower: PALE YELLOW in Early Summer

Light: FULL SUN **Soil:** WELL DRAINED **Height:** 25 cm

The underside of the deep blue-green leaves have long silky hairs that give a silver edge to leaf. This is found growing from Greenland and northern Europe south to the Pyrenees and Alps, in screes, stony slopes, rock crevices and grassland, in the sun. (Limited Availability) (Family: Rosaceae; Native to: Eurasia)

Alpine Lady's Mantle

(12cm Short Pot) \$12.00

Anemone nemorosa Hilda

Flower: WHITE in Late Spring

Light: PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 15 cm

Superb and distinct variety with pure white flowers and double the usual quantity of petals. Originally found near Slagelse, Seeland, Denmark by Dean Ulrich Toubol, who introduced and named this superb clone. (Family: Ranunculaceae; Native to: GARDEN ORIG.)

(13cm Short Pot) \$16.00

Anemone nemorosa Royal Blue

Flower: DEEP BLUE FLOWERS WITH PURPLE BACKS in Late Spring

Light: PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 15 cm

(Family: Ranunculaceae; Native to: GARDEN ORIG.)

(13cm Short Pot) \$14.00

Anemone sylvestris Elise Fellmann

Flower: DOUBLE CREAMY WHITE in Late Spring

Light: PARTIAL SHADE **Soil:** MOIST **Height:** 25 cm

An excellent inhabitant for open woodlands making a carpet of 10-15" tall, arching stems bearing ivory white flowers. Try combining them with botanical bulbs such as grape hyacinths, Siberian squill. (Limited Availability) (Family: Ranunculaceae; Native to: GARDEN ORIG.)

Double flowered Wood Anemone

(13cm Short Pot) \$15.00

Arabis ferdinandi-coburgii Old Gold

Flower: WHITE in Late Spring

Light: PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 5 cm

Vigorous showy plant; fine small-scale ground cover; green & gold variegated foliage; profuse clusters of white blooms in late spring. (Family: Cruciferae; Native to: GARDEN ORIG.)

(13cm Short Pot) \$10.00

Arisaema triphyllum

Flower: MAHOGANY TO GREEN in Early Summer

Light: PARTIAL SHADE **Soil:** WOODLAND **Height:** 35 cm

Above a pair of 3-lobed leaves appears the fascinating flower. The drooping spathe, the pulpit, can be solid green to green with purple stripes and the spadix, Jack, is usually dark purple. Later in the summer, the flower is replaced by a black seed cluster that turns a rich red by autumn. (Family: Araceae; Native to: Eastern N. America)

Three-Leaved Jack-in-the-Pulpit

(12cm Deep Pot) \$18.00

Asarum europaeum

Flower: MAHOGANY in Late Spring

Light: PARTIAL SHADE **Soil:** MOIST **Height:** 10 cm

Beautiful glossy rich green leaves form dense spreading carpets in shady sites; discrete reddish brown urn-shaped blooms hide beneath the unfolding new leaves in early spring; foliage emits faint sweet ginger fragrance, roots are strongly fragrant. (Family: Aristolochiaceae; Native to: Europe)

European Wild Ginger

(13cm Short Pot) \$26.00

Pricing is based on plant size, how fast it can be propagated and rarity. Pot sizes are based on the diameter of the pot.

NEW PLANTS for us this year have the word NEW! in red beside them.

Availability and pricing is correct at time of printing but may change. All prices include 5% GST.

August 2017 ©Rundle Wood Gardens Ltd.

Asplenium viride	Green Spleenwort
Flower: NONE Light: PARTIAL SHADE Soil: ROCK GARDEN Height: 15 cm	(9cm Pot)\$9.00
Moist, sheltered, often shady crevices on cliffs, outcrops or talus slopes. Prefers limestone or other calcium-rich rock. Found from lowland to alpine zone. Circumpolar but scattered and infrequent in our mountains. Spores collected in the Kootenay Mountains, BC (Family: Aspleniaceae; Native to: Western N. America)	
Athyrium felix-femina Dre's Dagger	Dre's Dagger Lady Fern
Flower: NONE Light: PARTIAL SHADE Soil: MOIST Height: 35 cm	(12cm Deep Pot) \$13.00 (13cm Deep Pot) \$17.00
A more compact form of the sought after Victoria fern. The slim, deep green fronds are unusually crisscrossed and come to a narrow point that terminates with a small crest that grows through the season. It brings elegance to any shaded or morning sun location in rich soils. The red petioles contrast nicely with the apple green foliage. (Family: Woodsiaceae; Native to: GARDEN ORIG.)	
Athyrium filix-femina Lady in Red	Lady in Red Fern
Flower: NONE Light: PARTIAL-FULL SHADE Soil: MOIST Height: 50 cm	(15cm Pot) \$15.00
Lady in Red' has sultry red stems surrounded by bright green, lacy fronds with new fronds appearing all season. Clumps are dense and upright. This deciduous fern is vigorous and easy to grow. (Family: Woodsiaceae; Native to: GARDEN ORIG.)	
Athyrium x Branford Beauty	Branford Beauty Fern
Flower: NONE Light: PARTIAL-FULL SHADE Soil: MOIST Height: 30 cm	(12cm Deep Pot) \$12.00
A cross between lady fern (Athyrium filix-femina) and Japanese painted fern (A. niponicum 'Pictum'). The result is a clump-forming rigidly upright large fern with the habit of lady fern but the silver colouration of the Japanese painted fern including red stalks. (Family: Woodsiaceae; Native to: GARDEN ORIG.)	
Cardamine enneaphylla	Nine-leaved toothwort
Flower: CREAM in Early Spring Light: PARTIAL SHADE Soil: MOIST Height: 15 cm	(12cm Deep Pot) \$15.00
Grows to about 15cm tall, forming a nice colony, with creamy bell shaped flowers. Dan Hinkley, in his fine book, The Explorer's Garden, calls this the most beautiful of the many species he grows. The combination of its very shiny, crisp foliage, and pretty little flowers is quite pleasing. (Limited Availability) (Family: Cruciferae; Native to: Slovenia)	
Cardamine pentaphylla	Pink Cardamine
Flower: PINK in Late Spring Light: PARTIAL SHADE Soil: MOIST Height: 25 cm	(13cm Short Pot) \$19.00
Flowering in May or early June, producing pink-mauve flowers, held in round clusters of 12 or more above the foliage. The palmate leaves are finely cut and the plant forms a dense clump. (AGM/RHS) (Family: Cruciferae; Native to: Western Europe)	
Clematis heracleifolia Davidiana	Bush Clematis Davidiana
Flower: PURPLISH-BLUE in Late Summer Light: SUN to PARTIAL SHADE Soil: WELL DRAINED Height: 120 cm	(13cm Deep Pot) \$21.00
A semi-herbaceous perennial with strong stems that mature into a clump. The scented, clear lavender-blue, hyacinth like, 1.5" (3.5cm) flowers, are produced in late July through September. Mature height 3' (1m). Prune to within a few inches of the ground in late winter. (Family: Ranunculaceae; Native to: GARDEN ORIG.)	
Clematis heracleifolia New Love	Bush Clematis New Love
Flower: VIOLET-BLUE in Late Summer Light: SUN to PARTIAL SHADE Soil: WELL DRAINED Height: 90 cm	(13cm Deep Pot) \$21.00
A heracleifolia type with fragrant violet-blue tubular flowers, darker on the outside than the inside. This cultivar originates from a seedling in John Fopma's clematis collection and is named for Ria Stockmann. Non-climbing. Prune to the ground in late winter. (Family: Ranunculaceae; Native to: GARDEN ORIG.)	
Clematis recta Serious Black NEW!	Serious Black Bush Clematis
Flower: FRAGRANT CREAM CLUSTERS in Late Spring Light: FULL SUN Soil: WELL DRAINED Height: 150 cm	(18cm Pot) \$36.00
Upright herbaceous clematis with glossy purple foliage in the spring and many masses of white flowers blooming atop 3' clumps of olive green foliage in summer. After flowering, new foliage is dark purple again, and compared to Clematis 'Purpurea', this cultivar blooms more profusely. (Family: Ranunculaceae; Native to: GARDEN ORIG.)	
Clematis x Joe Zary	
Flower: BRIGHT VIOLET PINK in Late Spring Light: SUN to PARTIAL SHADE Soil: WELL DRAINED Height: 200 cm	(15cm Pot) \$25.00
A very full macropetala type with buds a pale lavender and the outer tepals darken. Opens very flat. Once established will rebloom during summer. A C. (fauriei x alpina ssp sibirica) x macropetala hybrid bred by Stanley Zubrowski in Saskatchewan, Canada. No pruning necessary. (Family: Ranunculaceae; Native to: GARDEN ORIG.)	

Pricing is based on plant size, how fast it can be propagated and rarity. Pot sizes are based on the diameter of the pot.

NEW PLANTS for us this year have the word NEW! in red beside them.

Availability and pricing is correct at time of printing but may change. All prices include 5% GST.

Clematis x Saphyra Indigo

Flower: INDIGO BLUE in Early Summer to Fall
Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 150 cm

Medium sized indigo (dark purple-blue) flowers, paler later, with tepals deeply ribbed on the outside. Stamens dark violet at first, white at base later. This variety was awarded a bronze medal at Plantarium 2004 in Boskoop. (Family: Ranunculaceae; Native to: GARDEN ORIG.)

Sapphire Indigo Clematis

(15cm Pot) \$25.00

Clematis x Sweet Summer Love NEW!

Flower: CRANBERRY-PURPLE FRAGRANT in Mid-Summer
Light: FULL SUN **Soil:** MOIST **Height:** 200 cm

Beginning to flower in July with clusters of richly coloured and fragrant flowers, this clematis should be planted in a spot where you can enjoy the fragrance. Developed by Clematis breeder Szczepan Marczyński of Poland. Prune back in early spring. As with all clematis, it may take a couple of seasons for it to really take off. It needs to get its roots deeply into the ground. (Family: Ranunculaceae; Native to: GARDEN ORIG.)

Clematis Sweet Summer Love

(13cm Deep Pot) \$27.00

Clematis x fargesiodes (Paul Farges)

Flower: CREAM in Mid to Late Summer
Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 300 cm

A cross between *C. fargesii* and *C. vitalba*. Fragrant, silver dollar-sized flowers on a vigorous vine. Prune in very early spring. It is also known by 'Paul Farges', which preserves the original reference to the French missionary and explorer who bore that name. No Pruning necessary. (Family: Ranunculaceae; Native to: GARDEN ORIG.)

Summer Snow (Paul Farges)

(12cm Deep Pot) \$17.00

Clematis x integrifolia Arabella

Flower: PURPLE BLUE in Summer to Frost
Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 150 cm

Purple-blue flowers with prominent cream anthers. Very free-flowering over a long period. Ideal for growing through small shrubs. A hybrid of *C. integrifolia* raised by Barry Fretwell and introduced in 1990. Prune to the ground in very early spring. (Family: Ranunculaceae; Native to: GARDEN ORIG.)

Clematis Arabella

(13cm Deep Pot) \$17.00

Clematis x integrifolia Inspiration

Flower: DARK PINK in Summer to Frost
Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 200 cm

This free-flowering herbaceous variety has medium-sized flowers dark pink in colour with yellow stamens with a long flowering period. Compact habit. Looks like a pink form of *C. x Durnadii*. Prune to ground in very early spring. (*C. integrifolia* 'Rosea' x *C. 'Warsaw Nike'*) (Family: Ranunculaceae; Native to: GARDEN ORIG.)

Clematis Inspiration

(15cm Pot) \$25.00

Clematis x integrifolia Pamjat Serdsta

Flower: PURPLE in Early Summer to Fall
Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 120 cm

The name translates as "memory of the heart". Long blooming and satin sheened, the rich colored heliotrope purple blooms show off darker, glossier midribs. Developed at the Ukraine's Nikita Botanic Garden. Prune to the ground in late winter, early spring. (Family: Ranunculaceae; Native to: GARDEN ORIG.)

Clematis Pamjat Serdsta

(13cm Deep Pot) \$21.00

Clematis x integrifolia Roguchi

Flower: BLUE-PURPLE NODDING in Summer to Frost
Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 200 cm

With bells to 5 cm (2 inches) long (especially on the earliest flowers), and strong ridging on thick sepals, somehow deepening the color and intensifying the luster of the *integrifolia* parent. Pale borders accentuate the four sepals, which are the blue of Italian plums. Prune to ground in late winter. (Family: Ranunculaceae; Native to: GARDEN ORIG.)

Clematis Roguchi

(13cm Deep Pot) \$18.00

Clematis x jouiniana Chance

Flower: PALE MAUVE in Late Summer
Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 250 cm

Small white flowers with a bluish tinge, lightly scented. (Family: Ranunculaceae; Native to: GARDEN ORIG.)

(13cm Deep Pot) \$26.00

Clematis x koreana Brunette

Flower: RUBY RED-CHOCOLATE in Early Summer to Fall
Light: SUN to PARTIAL SHADE **Soil:** MOIST **Height:** 300 cm

Lightly scented, deep reddish purple flowers with a hint of brown and a satinlike sheen. The main flowering period is April-May but 'Brunette' continues to flower on new growth until August. A hybrid of *C. koreana* var. *fragrans* x *C. fauriei* raised by Magnus Johnson in 1979. Excellent as a ground cover or scrambling through a low shrub. No pruning necessary. (Family: Ranunculaceae; Native to: GARDEN ORIG.)

(12cm Deep Pot) \$17.00

Clematis x viticella Etoile Violette

Flower: DEEP PURPLE in Mid-Summer
Light: FULL SUN **Soil:** WELL DRAINED **Height:** 300 cm

10 to 13 cm wide, deep purple flowers are produced in profusion. Creamy yellow stamens. Raised by Morel of Lyon in 1885, a very free-flowering cultivar. Prune to ground in early spring. (Family: Ranunculaceae; Native to: GARDEN ORIG.)

(12cm Deep Pot) \$17.00

Pricing is based on plant size, how fast it can be propagated and rarity. Pot sizes are based on the diameter of the pot.

NEW PLANTS for us this year have the word NEW! in red beside them.

Availability and pricing is correct at time of printing but may change. All prices include 5% GST.

Spring 2017 Catalogue Rundle Wood Gardens Ltd.

Clematis x viticella Purpurea Plena Elegans

Flower: PLUM-RED in Mid-Summer

(12cm Deep Pot) \$17.00

Light: FULL SUN **Soil:** MOIST **Height:** 200 cm

A 6cm wide cluster of narrow sepals recurved in the manner of a reflexed chrysanthemum make this unique among the viticellas. As the flowers are sterile they last a long time on the plant. Vigorous and free flowering. Prune to the ground in late winter. (AGM/RHS) (Family: Ranunculaceae; Native to: GARDEN ORIG.)

Cornus canadensis

Flower: PURE WHITE in Late Spring

(13cm Short Pot) \$12.00

Light: PARTIAL SHADE **Soil:** MOIST **Height:** 5 cm

A tidy crisp plant with a single white bloom in early summer that becomes a bright red berry. Sometimes the foliage will turn a deep burgundy as the nights become cooler. Bunchberries make a wonderful groundcover and are very showy when planted in groups. They prefer a moist shady area but will tolerate more sun as long as the moisture is there. (Family: Cornaceae; Native to: North America)

Cystopteris bulbifera

Flower: none

Bulblet Bladder Fern

(12cm Deep Pot) \$14.00

Light: PARTIAL-FULL SHADE **Soil:** MOIST **Height:** 35 cm

Cystopteris bulbifera is a low-growing rock fern with creeping stems and narrow elongate deltate fronds. C. bulbifera is unusual among ferns in producing bulblets along the bottom of the fronds. This is one of the easiest Cystopteris species to identify. (Family: Woodsiaceae; Native to: Eastern N. America)

Dodecatheon dentatum

Flower: WHITE in Late Spring

White Shooting Star

(12cm Deep Pot) \$12.00

Light: SUN to PARTIAL SHADE **Soil:** MOIST **Height:** 20 cm

A delicate, dwarf shooting stars, the flowering stem rising only 6 in. above the rosette of crinkled, toothed, basal leaves. Open umbels of white flowers top the flowering stem. (Limited Availability) (Family: Primulaceae; Native to: Western N. America)

Dodecatheon meadia Aphrodite

Flower: VIOLET-PINK in Late Spring

(12cm Deep Pot) \$8.00

Light: SUN to PARTIAL SHADE **Soil:** MOIST **Height:** 35 cm

Clusters of intense violet pink flowers, which smell faintly of grape juice, atop 30 cm tall stalks, in mid to late spring. (Family: Primulaceae; Native to: GARDEN ORIG.)

Dodecatheon meadia Lilac

Flower: LILAC in Late Spring

Lilac Shooting Star

(12cm Deep Pot) \$8.00

Light: SUN to PARTIAL SHADE **Soil:** MOIST **Height:** 25 cm

Beautiful late spring perennial. Does best in a spot that is moisture during the spring. If the soil dries out a bit, later in the season the plant will go dormant. (Family: Primulaceae; Native to: Eastern N. America)

Dodecatheon media Dwarf

Flower: MAGENTA in Late Spring

Dwarf Shooting Star

(12cm Deep Pot) \$10.00

Light: SUN to PARTIAL SHADE **Soil:** MOIST **Height:** 15 cm

basal clumps of leaves and nodding flowers that are produced at the top of tall stems that rise from where the leaves join the crown. (Family: Primulaceae; Native to: GARDEN ORIG.)

Dodecatheon x media Aphrodite

Flower: VIBRANT MAGENTA in Late Spring

Aphrodite Shootingstar

(9cm Pot) \$13.00

Light: SUN to PARTIAL SHADE **Soil:** MOIST **Height:** 30 cm

(12cm Deep Pot) \$15.00

Aphrodite has hybrid vigor and is taller, with a more robust appearance, than species dodecatheon. Flowers are much larger than the normal as well, blooming in a deep orchid-pink. As with most shootingstars they like moisture in the spring and once they go dormant it can be much drier. (Family: Primulaceae; Native to: GARDEN ORIG.)

Epimedium grandiflora ssp. koreanum Harold Epstein

Flower: BUTTER YELLOW in Early Summer

(13cm Deep Pot) \$29.00

Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 30 cm

Large, long-spurred, buttery yellow blossoms emerge before the first bronzed leaflets develop in early spring. Named in honour of Harold Epstein, in whose garden this clone was original found. (Limited Availability) (Family: Berberidaceae; Native to: GARDEN ORIG.)

Epimedium x Free Spirit Spring Chocolate

Flower: SOFT YELLOW in Late Spring

(13cm Deep Pot) \$37.00

Light: PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 30 cm

This new introduction by a Specialty Nursery in B.C. has beautiful Chocolate foliage in the spring with soft yellow flowers. (Limited Availability) (Family: Berberidaceae; Native to: GARDEN ORIG.)

Pricing is based on plant size, how fast it can be propagated and rarity. Pot sizes are based on the diameter of the pot.

NEW PLANTS for us this year have the word NEW! in red beside them.

Availability and pricing is correct at time of printing but may change. All prices include 5% GST.

August 2017 ©Rundle Wood Gardens Ltd.

Spring 2017 Catalogue Rundle Wood Gardens Ltd.

Epimedium x rubrum Sweetheart

Flower: RED in Late Spring

(13cm Deep Pot) \$27.00

Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 35 cm

This Darrell Probst hybrid (E. sempervirens 'Candy Hearts' x E. alpinum) is a stunning, much-improved version of the typical E. x rubrum. A stately selection with red-rimmed leaves in spring to about 14-16 inches high, 'Sweetheart' produces dark rose-red flowers held above as well as in among the leaves. (Limited Availability) (Family: Berberidaceae; Native to: GARDEN ORIG.)

Gentiana ascelpiadea

Willow Gentian

Flower: BLUE in Late Summer

(13cm Deep Pot) \$22.00

Light: PARTIAL SHADE **Soil:** MOIST **Height:** 60 cm

A great plant for mid-to-late-summer flowers. Arching stems clothed in narrow leaves produce blue trumpet-shaped flowers up the stem. Tolerant of shadier locations. (Limited Availability) (Family: Gentianaceae;)

Geranium x Phillipe Vapelle

Flower: BLUISH-PURPLE in Early Summer

(13cm Deep Pot) \$14.00

Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 35 cm

Large deep blue flowers in early summer. Broad softly hairy leaves, deciduous. (Family: Geraniaceae; Native to: GARDEN ORIG.)

Geranium x cantabrigiense Crystal Rose

Flower: BRIGHT MAGENTA PINK in Early Summer

(13cm Short Pot) \$11.00

Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 25 cm

This selection forms a low, spreading, compact mat of fragrant, dark-green leaves, bearing clusters of long-lasting, bright magenta-pink flowers, late spring through late summer. Foliage develops an orange tint in fall with the onset of cooler temperatures. (Family: Geraniaceae; Native to: GARDEN ORIG.)

Gymnocarpium dryopteris

Oak Fern

Flower: NONE

(15cm Pot) \$15.00

Light: PARTIAL SHADE **Soil:** MOIST **Height:** 30 cm

A delicate, deciduous fern to 12" tall. Quite common in our North Woods. Oak fern is easily identified by its delicate, triangular fronds, which are usually held nearly horizontal. (Family: Woodsiaceae; Native to: Western N. America)

Hepatica nobilis Blue

Blue European Hepatica

Flower: BLUE in Early Spring

(9cm Pot)\$15.00

Light: PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 10 cm

An early spring bloomer for the woodland garden. The rich blue flowers, shaped like those of an anemone, appear before the deep green 3 lobed leaves. (AGM/RHS) (Family: Ranunculaceae; Native to: Europe)

Heuchera x Circus

Flower: HOT PINKISH-RED in Mid-Summer

(12cm Deep Pot) \$15.00

Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 25 cm

Chartreuse leaves with red veining, a light dusting of silvering and an explosion of hot pinkish-red flowers. (Family: Saxifragaceae; Native to: GARDEN ORIG.)

Heuchera x Paris

Flower: RED in Summer to Frost

(12cm Deep Pot) \$18.00

Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 12 cm

The large rose-red flowers of 'Paris' Coral Bells appear throughout the summer, floating over silver-green foliage. (Family: Saxifragaceae; Native to: GARDEN ORIG.)

Heuchera x Petite Marble Burgundy

Flower: PINK in Early Summer

(13cm Short Pot) \$14.00

Light: SUN to PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 0 cm

Compact grower. Leaves are bronze with powerful silver spots. Flowercolor: light pink/white (Family: Saxifragaceae; Native to: GARDEN ORIG.)

Hylomecon japonica

Japanese Woodland Poppy

Flower: YELLOW in Late Spring

(12cm Deep Pot) \$9.00

Light: PARTIAL SHADE **Soil:** WELL DRAINED **Height:** 30 cm

(15cm Pot) \$.00

A small perennial woodland poppy relative from Japan. The plant forms tubers that start to grow in early spring. The flowers appear mid- May and continue for about 4 weeks. When flowering is finished the plant has made a nice tight clump of leaves that persist until mid- summer. At that time the leaves die back, and the plant rests underground until next spring. (Family: Papaveraceae; Native to: Japan)

Jeffersonia dubia

Asian Twinleaf

Flower: LAVENDER BLUE in Early Spring

(12cm Deep Pot) \$22.00

Light: PARTIAL SHADE **Soil:** MOIST **Height:** 25 cm

Rich lavender blue upward facing flowers emerge in early spring, followed by lobed foliage through the rest of the season. (Family: Berberidaceae; Native to: Korea)

Pricing is based on plant size, how fast it can be propagated and rarity. Pot sizes are based on the diameter of the pot.

NEW PLANTS for us this year have the word NEW! in red beside them.

Availability and pricing is correct at time of printing but may change. All prices include 5% GST.

August 2017 ©Rundle Wood Gardens Ltd.

<p>Lamium orvala Flower: MAUVE in Late Spring Light: SUN to PARTIAL SHADE Soil: WOODLAND Height: 50 cm Broadly ovate, glossy dark green leaves, stout bushy plant. Hardy, non-invasive clump forming perennial to 40-50cm, with toothed, broadly ovate, glossy dark green leaves. Spikes of whorled pinkish-purple flowers are produced from late spring to summer. Grow in not too rich, well-drained soil in full or part shade. (Limited Availability) (Family: Labiatae; Native to: Central Europe)</p>	<p>Upright Deadnettle (13cm Deep Pot) \$12.00</p>
<p>Larix occidentalis Bollinger Flower: NONE Light: SUN to PARTIAL SHADE Soil: DRY Height: 100 cm Western Larch. Needles are bright green, held on short branches, radiating outward in all directions, the classic "broom" shape. Grows to 1m in 10 years. (Limited Availability) (Family: Pinaceae; Native to: GARDEN ORIG.)</p>	<p>Bollinger Dwarf Western Larch (15cm Pot) \$30.00</p>
<p>Ligularia x Britt-Marie Crawford Flower: YELLOW in Late Summer Light: PARTIAL SHADE Soil: MOIST Height: 120 cm This unique Ligularia has the deepest maroon/black leaves and orange daisy-like flowers. Grow in fertile, moisture retentive soil in full sun or partial shade. The foliage color is a bit more pronounced with a little morning sun and a bit duller in complete shade. (Family: Asteraceae; Native to: GARDEN ORIG.)</p>	<p>Black-leaved Ligularia (15cm Pot) \$25.00</p>
<p>Ligularia x King Kong Flower: GOLDEN YELLOW in Mid-Summer Light: PARTIAL SHADE Soil: MOIST Height: 90 cm This part-shade loving perennial has the same dark foliage that gardeners have long admired in 'Britt-Marie Crawford', but with leaves nearly twice as big at 16" across. The newest leaves are glossy and black-purple-as the summer progresses the leaves mellow to burgundy purple with a semi-glossy finish. Leaves are thick and leathery, with an undulating leaf edge. (Family: Asteraceae; Native to: GARDEN ORIG.)</p>	<p>(13cm Deep Pot) \$23.00</p>
<p>Molopospermum peloponnesiacum NEW! Flower: WHITE in Mid-Summer Light: SUN to PARTIAL SHADE Soil: WELL DRAINED Height: 150 cm From the mountains of central and southern Europe comes this large and ornamental, strongly aromatic perennial plant. It has handsome and decorative, shiny, long-pointed, fern-like foliage and bears in late spring large numbers of yellow turning cream flowers. This is a plant that certainly has WOW factor. It will really draw attention to your garden and it is well worth learning to get your tongue around the name. (Family: Umbelliferae; Native to: Pyrenees)</p>	<p>Striped Hemlock seeds (13cm Deep Pot) \$16.00</p>
<p>Monarda x Balmy Rose Flower: ROSE in Mid-Summer Light: SUN to PARTIAL SHADE Soil: WELL DRAINED Height: 25 cm Best mildew resistance of today's commercial cultivars, very floriferous and compact, rose color flowers, lance-shaped dark green fragrant foliage. (Family: Labiatae; Native to: GARDEN ORIG.)</p>	<p>Dwarf Rose BeeBalm (13cm Short Pot) \$10.00</p>
<p>Monarda x Snow White NEW! Flower: WHITE in Mid-Summer Light: SUN to PARTIAL SHADE Soil: WELL DRAINED Height: 75 cm Snow White Beebalm features beautiful clusters of fragrant white flowers at the ends of the stems from mid to late summer, which are most effective when planted in groupings. (Family: Labiatae; Native to: GARDEN ORIG.)</p>	<p>Snow White Beebalm (13cm Deep Pot) \$12.00</p>
<p>Omphalodes verna Flower: BLUE in Late Spring Light: PARTIAL-FULL SHADE Soil: WELL DRAINED Height: 20 cm Sky blue flowers on short stems rise above bright green, oval shaped leaves. An excellent ground cover for under trees. Requires moisture in the spring, but tolerates many soil types. (Family: Boraginaceae; Native to: Alps and Pyrenees)</p>	<p>Blue-Eyed Mary (13cm Short Pot) \$14.00</p>
<p>Pinus cembra Stricta Flower: NONE Light: SUN to PARTIAL SHADE Soil: WELL DRAINED Height: 120 cm Narrow columnar growth. Dens foliage and slow growth make it a valuable and unique. Needles are soft blue-green. 'Stricta' has been in cultivation since 1855. Prefers full sun in well-drained soil. 1.2 m tall x 40 cm wide in 10 years. (Limited Availability) (Family: Pinaceae; Native to: GARDEN ORIG.)</p>	<p>(15cm Pot) \$30.00</p>
<p>Polygonatum odoratum flora plena Flower: WHITE AND GREEN in Late Spring Light: PARTIAL SHADE Soil: MOIST Height: 50 cm Hard to come by and desirable double form of this excellent garden plant. The extra petals looks like a little green rose when you lift one of the dangling white bells and peer inside. (Family: Convallariaceae; Native to: GARDEN ORIG.)</p>	<p>Double flowered Solomon Seal (15cm Pot) \$27.00</p>

Pricing is based on plant size, how fast it can be propagated and rarity. Pot sizes are based on the diameter of the pot.

Spring 2017 Catalogue Rundle Wood Gardens Ltd.

Primula x pruhoniana Ostergruss Flower: MAGENTA, YELLOW EYE in Late Spring Light: PARTIAL SHADE Soil: WELL DRAINED Height: 10 cm This compact growing Juliae hybrid is a tough and reliable performer in the garden. Clumping up nicely. (Family: Primulaceae; Native to: GARDEN ORIG.)	Easter Greeting Primula (12cm Deep Pot) \$10.00
Pulmonaria x Silver Bouquet Flower: BLUE, PINK in Late Spring Light: PARTIAL SHADE Soil: WELL DRAINED Height: 20 cm mildew resistance, heat and humidity tolerance with large coral to pink to violet flowers that "look at you." Spectacular silver foliage for an all summer show. (Family: Boraginaceae; Native to: GARDEN ORIG.)	Silver Bouquet Lungwort (13cm Deep Pot) \$17.00
Ranunculus parnassifolia Flower: WHITE in Early Summer Light: SUN to PARTIAL SHADE Soil: SCREE Height: 20 cm Glossy, leathery, dark green oval leaves. Short stems of snow-white flowers with wide overlapping petals. Choice and rare. (Limited Availability) (Family: Ranunculaceae; Native to: Pyrenees)	Parnassis-leaved Buttercup (12cm Deep Pot) \$10.00
Sanguinaria canadensis Multiplex Flower: PURE DOUBLE WHITE in Early Spring Light: PARTIAL SHADE Soil: MOIST Height: 15 cm Pristine white waterlily-like flowers emerge in spring, the new leaf cupped around the flowering stem. Grow in a well drained site in light shade with a woods soil, reasonably high in organic matter. (Limited Availability) (Family: Papaveraceae; Native to: GARDEN ORIG.)	Double Flowered Bloodroot (12cm Deep Pot) \$31.00 (13cm Deep Pot) \$46.00
Trillium grandiflorum Flower: LARGE WHITE in Late Spring Light: PARTIAL SHADE Soil: MOIST Height: 30 cm This beautiful native of Eastern deciduous forests does very well in our woodland garden. Each spring large white 3-petaled flowers brighten up our shady area. Slowly multiplies by underground tubers. (AGM/RHS) (Family: Trilliaceae; Native to: Eastern N. America)	Large White Trillium (12cm Deep Pot) \$16.00
Tsuga diversifolia Gracilis Flower: NONE Light: SUN to PARTIAL SHADE Soil: MOIST Height: 150 cm Dwarf, rounded shrub. Dense branching gives way to a more stiffly structured plant with age. The unusual short and rounded needles are a rich glossy green. About 5 cm of growth per year. (Limited Availability) (Family: Pinaceae; Native to: Northern Japan)	Northern Japanese Hemlock (15cm Pot) \$30.00
Valeriana sp Flower: FRAGRANT PINK in Mid-Summer Light: SUN to PARTIAL SHADE Soil: WELL DRAINED Height: 10 cm Relatively slow growing, shiny green leaves; flowers are pink in large, attractive heads; (Limited Availability) (Family: Valerianaceae; Native to: Pyrenees)	(12cm Deep Pot) \$9.00
Veronica x Blue Explosion NEW! Flower: RICH BLUE in Early Summer to Fall Light: SUN to PARTIAL SHADE Soil: WELL DRAINED Height: 45 cm Compact, dwarf, mounding plant with dense, bushy spikes bearing masses of blue flowers. Lance-shaped medium green foliage. Prefers average to moist, well drained soils in full sun. Light shade tolerant, but flowers better in full sun. Remove spent flowers to promote additional flowers throughout the fall. (Family: Scrophulariaceae; Native to: GARDEN ORIG.)	Blue Explosion Speedwell (13cm Deep Pot) \$11.00
Veronica x Tidal Pool Flower: RICH BLUE in Early Summer Light: SUN to PARTIAL SHADE Soil: WELL DRAINED Height: 5 cm This hybrid prostrate speedwell was selected from a cross made at the Chicago Botanic Garden in 2007 between Veronica armena and Veronica pectinata 'Rosea', two already popular prostrate speedwells. This selection seems to have inherited the best traits from both parents: it's denser and faster spreading than either parent, with small oaklike leaves that are medium green with a faint silvery-blue cast from its slight pubescence. (Family: Scrophulariaceae; Native to: GARDEN ORIG.)	Tidal Pool Speedwell (13cm Short Pot) \$9.00

Pricing is based on plant size, how fast it can be propagated and rarity. Pot sizes are based on the diameter of the pot.
